1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show details of strip conductors as set forth in claim 15. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and

informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claims 13-15 are objected to because of the following informalities:

In claim 13, there is no antecedent basis for “electric wires”;

In claim 14, line 2, “electric wires” should be ---said electric wires---;

In claim 15, there is no antecedent basis for “strip conductors”.

Appropriate correction is required.

4. Claims 1-20 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to show a ball and sleeve joint with a ball sleeve extending out of the housing on both sides; the ball sleeve having a through hole and a bearing area and is being mounted with the bearing area in the housing such that two joint parts which are rotatable and pivotable in relation to one another are formed by the ball sleeve and the housing with a signal transmitter and the sensor as set forth in claim 1 (20).

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note PTO-892.

This application is in condition for allowance except for the above informal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
